

# SAI VIKRANTH KANURU

kanuruvikranth@gmail.com | +91 9398596589 | Portfolio | GitHub | LinkedIn

## Career Objective

---

B.Tech Electronics and Communication Engineering student building Generative AI and agentic systems, particularly Retrieval-Augmented Generation (RAG) applications. Passionate about solving problems end-to-end and developing production-grade AI solutions. Seeking an internship opportunity to contribute to real-world AI projects and collaborate with engineering teams.

## Technical Skills

---

**AI/GenAI:** LangChain, LangGraph, LangSmith, RAG, Prompt Engineering, FastMCP, Semantic Search, Hybrid Search, Reranking

**Backend:** Python, FastAPI, SQLAlchemy, Playwright, Pydantic, Celery(familiar), REST APIs, WebSockets

**Databases:** PostgreSQL, MySQL, Redis, Qdrant, FAISS, ChromaDB

**LLM & ML:** HuggingFace, Sentence Transformers, Embedding Models

**Tools & DevOps:** Docker, Ragas, Flower, Git, GitHub

## Projects

---

### Conversational Text2SQL Assistant & Obsidian Console

- Built a natural language SQL assistant with intelligent routing and self-healing query execution.
- Added SQL security layers to block destructive queries and mask sensitive data.
- Reduced query latency by 60% using Redis caching, connection pooling, and LangSmith tracing.
- Developed a console with live statistics, exports, and MySQL-to-PostgreSQL dialect conversion.

### Multi-Source RAG AI Assistant

- Built a document assistant supporting PDFs, websites, text files, and scanned documents using Llama-Parse OCR.
- Improved retrieval accuracy by 25% through hybrid search, embeddings, and neural reranking.
- Reduced response time by 40% using LangGraph workflows with PostgreSQL memory.
- Built telemetry dashboards with retrieval metrics, audit trails, and LangSmith integration.

### GitHub Autonomous PR Review Agent

- Built an asynchronous, event-driven PR review pipeline supporting instant GitHub analysis using FastAPI, Celery, and LLaMA 3.
- Reduced review turnaround by 99% using parallel LangGraph workflows and Redis queuing.
- Improved AI review accuracy by 95% using an “LLM-as-a-Judge” filter and Qdrant RAG memory.
- Built a scalable backend with Docker, Nginx, Celery, and Flower monitoring.

## Education

---

### Bachelor of Technology – Electronics and Communication Engineering

MVGR College of Engineering, Vizianagaram

Expected May 2028

CGPA: 7.06

### Intermediate – Science (MPC)

Narayana Junior College, Vizianagaram

May 2024

CGPA: 8.72

### Class 10 – SSC

Fort City School, Vizianagaram

March 2022

CGPA: 8.58

## Certifications

---

- Python Essentials 1 & 2 – Cisco Networking Academy
- Quantum Foundations – Andhra Pradesh Government

## Additional Information

---

**Areas of Interest:** Generative AI, Information Retrieval, Agentic Systems, System Design, DSA

**Strengths:** Problem-solving, analytical thinking, system-oriented approach, rapid learning, adaptability, and teamwork.
